Clarification on spacing between a graphic and the body of a written event

Below is a clarification about the spacing between a graphic and the text in the body of a written event. The best way to think about it is that the text on the outside of a graphic must be double spaced in the body of the paper. It can be single spaced in the inside of the graph. Graphs may be single spaced in the executive summary and in the appendix.

This is an example of a graphic that has been double spaced around it using text wrap.

nkfdnkfdknl fnkfnlkflkflknfkn lfknflknfnlk fdlknfdknlfdl knfddfnlfdnfdkn faddf nkdfnkdfn klfdlkndfknl knlfdnlkfdnlkfd

kdfkndfnkfdnkldfnklfdklnfdnklf dknlfdlknfdlknfdnlkfdlknfdnklfdknl fdnklfdnlkfdnkl klfdlkndfknl knlfdnlkfdnlkfd

This is double spaced below the graphic. In order to double-space you need to use the wrap text feature in Word. This is an example of a graph that would be penalty pointed.
